

XtraLick® Phos 5%

Mineral Lick

XtraLick® Phos 5% is a balanced mineral lick specially formulated for dairy cattle and ewes. The level of phosphorus (5%) present in this lick helps to replace losses during milk production. It also balances diets low in phosphorus (eg.. grass silage and kale) which can result in poor conception rates and returns to service. Phosphorus, together with the 8.5% calcium content also helps to promote strong bone growth.

1. Composition

▪ Calcium (Ca)	8.5	%
▪ Phosphorus (P)	5.0	%
▪ Magnesium (Mg)	5 000	mg/kg
▪ Iron (Fe)	3 000	mg/kg
▪ Cobalt (Co)	50	mg/kg
▪ Iodine (I)	300	mg/kg
▪ Manganese (Mn)	2 500	mg/kg
▪ Zinc (Zn)	300	mg/kg
▪ Selenium (Se)	10	mg/kg
▪ Sodium	20.0	%

2. Use

XtraLick® Phos 5% can be supplied to the following livestock:

- Cattle
